### Product Information

Product type	Universe
Certification	EN-1176
Dimensions	7,9 x 1,7 x 2,4 m (length x width x height)

### Materials

Metal poles of 127 mm  
Metal tubes 27,34, 43 and 48 mm  
Metal parts polyester coated  
Inox sliding tube 48 mm  
Aluminium and plastic clamps  
Plastic pole and protection caps  
Sheet material and climbing grips in HDPE polyethylene

### Technical Information

Maximum fall height	1,30 m
Security zone	52 m <sup>2</sup>
Number of children	20
Concrete required	
No surface fixation available	

### Product Description

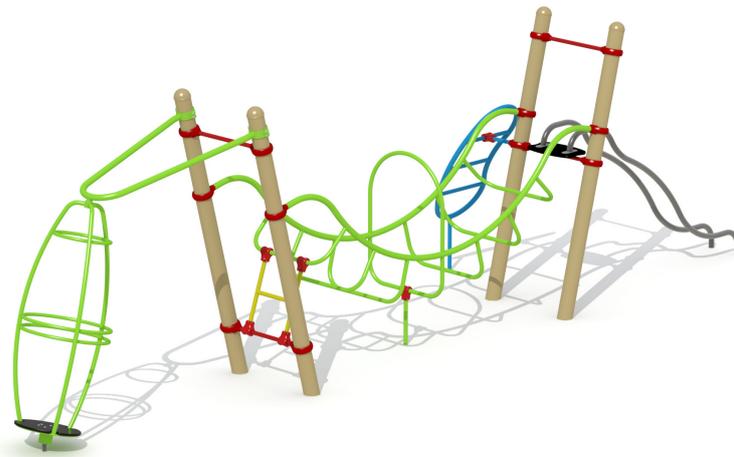

Challenging modern playground equipment for children aged 6 to 15. It is built out of 2 vertical poles to which a metal bean-shaped climber and 2 parallel inox sliding tubes (diameter 48 mm) are attached. At the starting point of the sliding tubes, there is a platform with non-slip HDPE polyethylene. These 2 vertical poles are connected to 2 other vertical poles by means of a U-shaped bridge with U-stairs. A rotating shuttle is connected to those last vertical poles with aluminium clamps. All metal parts are protected against rust and polyester coated. All nuts and bolts are completely protected. This playground equipment is fixed directly into the ground by using concrete.
