F0151 (A/B)

**3-6 YEARS**

**2-39 PERSONS-HOURS**

### Product Information

Product type	Fairy Land
Certification	EN-1176
Dimensions	7,8 x 7,4 x 4,4 m (length x width x height)

### Technical Information

Maximum fall height	1,90 m
Security zone	85,5 m <sup>2</sup>
Number of children	50
No concrete required	
Surface fixation available (ref. B)	

### Materials

Type of wood: larch  
 10 cm thick round wooden poles cut outside the heart  
 All metal parts are polyester coated  
 HDPE Polyethylene sheet material  
 Ropes and nets in 16 mm polypropylene rope with steel-wire reinforcement  
 Plastic slide  
 Handles, steering wheel and climbing grips in plastic  
 HDPE polyethylene crawl tunnel  
 Flower-shaped protection caps  
 Galvanized base supports  
 Non-slip rock wall

### Product Description

The playground equipment consists of a high play tower connected to several lower platforms. The first tower consists out of three platforms. The upper platform can be reached via an easy staircase with metal railings, a climbing arch and a HDPE polyethylene rock wall with climbing holds from plastic. The highest platform can be ascended via an incorporated spiral staircase. From the upper platform can be slid down via a metal spiral fireman's pole. One can go to the other playhouse by using the polyethylene crawl tunnel. It is equipped with a curved metal balustrade with plastic steering wheel and it can be reached via an easy two-fold staircase with metal railings, a climbing arch and a net climber. From this platform one can go 2 directions. For the first platform one just need to step down to the lower platform. This has a mini-gliss that is used as railing. Via a quadrant bridge another low platform which can be reached by a two-fold platform staircase with metal tube railings and a polyethylene climbing arch with wooden climbing holds. The second platform can be reached via the arched bridge with red railings. The upper platform can be left via a plastic slide. The playhouse can be accessed via an easy staircase with metal handrails. The whole is covered with a two-fold roof from rounded colorful polyethylene panels. Via a polyethylene crawl tunnel the other playhouse can be reached. It consists out of two platforms. The upper platform is at 93 cm height and can be left via a slide with stainless-steel slide plate and polyethylene edges.
