Product Description

Playground equipment in the shape of a windmill for children aged 6 to 15. The windmill is constructed around a central, roundwooden pole with diameter 14 cm. At the top you can see 4 impressive wicks, without a doubt the eye-catcher of this product. Under the wicks you can find a colorful play platform. The platform can be reached along three sides. You can use the climbing rope in the front or the rope ladder at the back to climb to the top. The fireman's pole can be used to enter or to leave the platform. Through the stainless steel tubes at the side you can slide down. All metal parts are treated against rust and are polyester-coated.
