Stainless steel slide and fixings

Product Description

A combination of 2 platforms that are connected by a balancing beam for children aged 6 to 14. The platforms and the roof are made of larch, the rest of the play equipment is made of robinia. The covered platform can be reached via a climbing rope or a balancing beam that goes upwards to the platform. The open platform can be reached via a climbing net and you can leave this platform with stainless steel slide. All nuts and bolts are completely covered with flower-shaped protection caps. This construction is fixed directly into the ground by using concrete.
