 No concrete required

### Materials

Panel in HDPE Polyethylene

### Product Description

Activity panel for children from 2 years. The activity panel 'ABC + 123' is made of HDPE polyethylene and has 2 different sides (one side with the alphabet and one side with calculations). This activity panel can be integrated in one of our existing play equipments (instead of a yellow sidewall) or can be used on its own in combination with two roundwooden poles (S032). All nuts and bolts are completely covered by flower-shaped protection caps.
