### Materials

Panel in HDPE Polyethylene

### Product Description

Activity panel for children from 2 years. The activity panel 'clock' is made of HDPE polyethylene. The children can move the hands of the clock. This activity panel can be integrated in one of our existing play equipments (instead of a yellow sidewall) or can be used on it's own in combination with two roundwooden poles (S032). All nuts and bolts are completely covered by flower-shaped protection caps.
