No concrete required	
Surface fixation available (ref. B)	

Materials

Larch wood poles 10 cm thick cut outside the heart
 Metal tubes made from polyester-coated steel
 HDPE polyethylene disks
 Galvanized base supports
 Plastic protection caps

Product Description

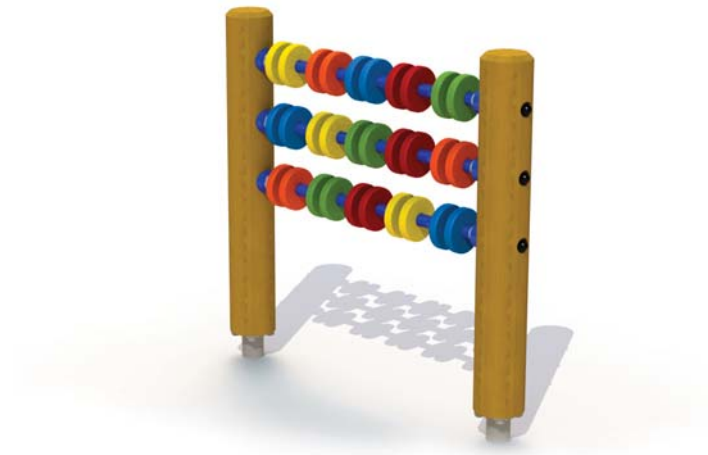

Educational abacus disk panel for children aged 2 to 6. This playground equipment is made out of 2 larch beams with diameter 10 cm which are placed on or into the ground by using metal base supports. The abacus disk panel is fixed between these beams. This abacus disk panel is made out of 3 polyestercoated tubes to which 10 coloured UV-resistant HDPE disks are attached. This playground equipment comes preassembled and may be placed on grass. All metal parts are treated against rust and all nuts and bolts are completely covered with plastic protection caps.
