No concrete required	
Surface fixation available (ref. B)	

Materials

Metal tubes made from stainless or polyester-coated steel
 HDPE polyethylene sheet material and disks
 Flower-shaped protection caps
 Galvanized base supports

Product Description

Educational arched abacus for children aged 2 to 6. This playground equipment is made out of 1 u-shaped metal stainless steel tube. At both sides of this tube there are 2 larch HDPE polyethylene disks. This is to prevent that the smaller disks don't fall on the ground. These are made out of coloured UV-resistant HDPE. All metal parts are treated against rust and all nuts and bolts are completely covered with plastic protection caps. This playground equipment comes preassembled and may be placed on grass.
