WALKING BARREL

Page 1/3

S950

 **6-12 YEARS**

 **2-3,5 PERSONS-HOURS**

Product Information

Product type Bouncing and turning
 Certification EN-1176
 Dimensions 1,3 x 1,0 x 1,6 m
 (length x width x height)

Technical Information

Maximum fall height 0,68 m
 Security zone 18 m²
 Number of children 1
 Concrete required
 No surface fixation available

Materials

Type of wood: larch
 Round wooden poles 12 cm thickness cut outside the heart
 Metal tubes of 33 mm diameter are treated against rust and polyester coated
 Maintenance-free axes and turning mechanisms
 HDPE polyethylene sheet material
 Tires as shock absorbers
 Metal handles
 Galvanized base supports

Product Description

Walking barrel for children aged 6 to 12. The playground equipment is made out of 2 vertical larch poles of 120 mm diameter and 1,5 m height. The walking barrel is placed between those 2 poles. The barrel is made out of 3 tires who are placed against each other. The tires are covered on the outside with yellow panels in flower-shape to make the whole more colourful. On top of the poles handles made out of polyester coated metal tubes are placed so that children can hold themselves when they walk across the barrel. At the bottom of the poles there are metal base supports that are placed into the ground. All metal parts are treated against rust and all nuts and bolts are completely covered with flower-shaped protection caps.
