Flower-shaped protection caps
All metal parts are treated against rust and polyester coated

Product Description

Smaller version of our modern train with several playing possibilities for children aged 2 to 8. The train consists of a locomotive and has a plastic steering grip. This part also has some sitting benches on which children can relax. At the side there is an abacus and bar which add extra play value. At the back of the train (against the wall), there's a maze attached. The train is made largely out of HDPE polyethylene. The train can stand free on a hard surface or can be put on loose soil by using 7 supports. The train is made out of larch, the lower girders out of tropical hardwood. All metal parts are treated against rust and all nuts and bolts are completely covered with flower-shaped protection caps.
